NEW PORTER SINGLE

T A X F R E E H O L L O W S

„Genosha“, the long-awaited third album by alternative rock band PORTER from the Ruhr area, is on the home straight and marks the band's new start after a turbulent few years. 10.11.2023 saw the release of the first single "Tax Free Hollows" on all major streaming portals, giving a clear foretaste of what is to come. At the same time, Porter released the video for "Tax Free Hollows" on the band's YouTube channel @porteralternativerock. @porteralternativerock.

The song sets a musical marker for the new PORTER and shows the musical direction of the album. Powerful guitar riffs, a pumping bass and driving drums set the musical counterpart to the urgency of the content. Above all this, new singer Raimund relaxes his charismatic melodic arcs and provides echoing moments. PORTER, now travelling as a sextet, are back with a vengeance.

"Tax Free Hollows" depicts a society that indulges in seemingly endless diplomatic debates instead of striving for real solutions, which can be quite painful; some react with agony and apathy in the face of almost unsolvable problems, others celebrate an apocalyptic ego party so as not to have to see the end coming.

In an endless time loop of repetitive actions and behaviour, a paralysing cycle is established here as normality, which appears to have no consequences whatsoever and leads to nothing except appeasing each other with the most diverse means. In the end, all of this works in a system that few of us have asked for, defined by simple minds that think only of themselves and generate their short-term benefits on the backs of everyone.

In their 2023 incarnation, PORTER sound more like themselves than ever before. This is not least due to the fact that the entire production process is now in the hands of the band without exception, meaning that the arrangements and sounds are finally exclusively self-determined and therefore 100% PORTER.

"Tax Free Hollows" can be heard on all known streaming platforms from 10.11.2023.
